

OFFLINE PLEDGE

We, the participants of MONTH OFFLINE, declare that we ought to be Free and Independent Human Beings; that we are Absolved from all dependence on big tech and their attention-grabbing algorithms. We solemnly pledge to forego the use of our smartphones for 30 days so that our social, psychological, and spiritual freedom can be rightfully restored. We trade dopamine for daylight, doomscrolls for detours, pixels for paper maps. Here's to boredom, to wrong turns, to fruitful friction. To shared growth, spontaneous encounters, and Life beyond the screen *
